

Amelia Shengaout

Atlanta, GA, USA | (678) 478-5677 | ameliaashengaout@gmail.com | [LinkedIn](#) | [GitHub](#) | U.S. Citizen

PROFESSIONAL SUMMARY

Software Engineer and MSCS student specializing in backend architecture, database design, and cloud infrastructure. Experienced in building full-stack platforms, engineering core business logic, and deploying secure enterprise data pipelines within the healthcare and insurance sectors.

SKILLS

Programming Languages: Java, Python, JavaScript, SQL (MySQL), NoSQL (CosmosDB, MongoDB)

Frameworks & Cloud: Spring Boot (Spring Data JPA), Django, Node.js, Azure (Data Factory, Logic Apps, Entra ID), REST APIs

Frontend & Mobile: React, React Native, HTML/CSS **Machine Learning:** PyTorch, Scikit-Learn, NumPy, Pandas

Tools & Methodologies: Git, Bitbucket, Maven, Agile, Jira, Confluence

Languages: English, Russian **Transferable Skills:** Written & Verbal Communication Skills, Collaboration, Leadership

EDUCATION

Georgia Institute of Technology, Atlanta, GA

Master of Science in Computer Science (Admitted Fall 2026)

August 2026 – May 2028 (expected)

Georgia State University, Atlanta, GA

Master of Science in Computer Science (Transferring to Georgia Institute of Technology)

August 2025 – Present

GPA: 4.2

Courses: Operating Systems, Computer Architecture, Advanced Machine Learning, Algorithms, Data Structures.

Kennesaw State University, Kennesaw, GA

Bachelor of Science in Biochemistry

August 2019 - May 2023

PROFESSIONAL EXPERIENCE

1st Care Management

Software Developer

Atlanta, GA

April 2026 - Present

- Architected and deployed the full Azure cloud infrastructure (App Service, SQL Database, Data Factory, Logic Apps, Entra ID) from scratch across dev, QA, and prod environments.
- Designed and built data pipelines using Azure Data Factory to automate healthcare data workflows, replacing fragmented manual spreadsheets with a structured cloud system.
- Developing the backend services and system architecture for a full-stack healthcare scheduling and QA platform.

Georgia State University

Graduate Teaching Assistant

Atlanta, GA

August 2025 – May 2026

- Provided technical code reviews for 100+ Data Structures students and evaluated semester-long software engineering projects for 17 teams.

InsuraPro

Software Developer

Roswell, GA

May 2023 - January 2025

- Engineered the core backend business logic and built Spring Boot API endpoints to handle complex data exchange for a high-scale Guidewire PolicyCenter (PC) pricing product.
- Architected and designed relational SQL database schemas to support new product features, data persistence, and backend integrations.
- Ensured robust version control, sprint-tracking, and documentation using Bitbucket, Confluence, and Jira.

PROJECTS & OUTSIDE EXPERIENCE

SNN vs Classical Machine Learning Benchmarking

Student Machine Learning Engineer

Atlanta, GA

February 2026 – April 2026

- Designed and optimized a fully connected SNN in PyTorch utilizing latency encoding to convert static pixel intensity into temporal spike trains.
- Ran hyperparameter experiments to benchmark accuracy and evaluate performance trade-offs against classical ML models.

Plateful

Student Software Engineer

Atlanta, GA

September 2025 - December 2025

- Contributed to end-to-end development of a cross-platform mobile app, following Agile methodology across the full SDLC.
- Built using React Native, Azure Cosmos DB, Firebase Authentication, and Anthropic Claude AI.
- Collaborated with a cross-functional team on requirements gathering, design, implementation, and deployment.
