

Amelia Shengaout

Atlanta, GA, USA | (678) 478-5677 | ameliaashengaout@gmail.com | [LinkedIn](#) | [GitHub](#) | U.S. Citizen

PROFESSIONAL SUMMARY

Software Engineer and MSCS student specializing in backend architecture, database design, and cloud infrastructure. Transitioning from a Biochemistry background into software engineering, with production experience building full-stack platforms, engineering core business logic, and deploying secure enterprise data pipelines within the healthcare and insurance sectors. Currently pursuing an MS in Computer Science while seeking Summer 2027 internship opportunities.

SKILLS

Programming Languages: Java, Python, JavaScript, SQL (MySQL), NoSQL (CosmosDB, MongoDB)

Frameworks & Cloud: Spring Boot (Spring Data JPA), Django, Node.js, Azure (Data Factory, Logic Apps, Entra ID, App Service, SQL Database), REST APIs, System Design, CI/CD

Frontend & Mobile: React, React Native, HTML/CSS

Machine Learning: PyTorch, Scikit-Learn, NumPy, Pandas

Tools & Methodologies: Git, Bitbucket, Maven, Agile, Jira, Confluence, Unit Testing

Languages: English, Russian

Transferable Skills: Written & Verbal Communication, Collaboration, Leadership

EDUCATION

Georgia Institute of Technology, Atlanta, GA

August 2026 – May 2028 (expected)

Master of Science in Computer Science — Transferred from Georgia State University (GPA: 4.2)

Kennesaw State University, Kennesaw, GA

August 2019 – May 2023

Bachelor of Science in Biochemistry

PROFESSIONAL EXPERIENCE

1st Care Management

Atlanta, GA

Software Developer

April 2026 – Present

- Architected and deployed full Azure cloud infrastructure (App Service, SQL Database, Data Factory, Logic Apps, Entra ID) from scratch across dev, QA, and prod environments, provisioning and integrating 5+ core services as sole backend developer.
- Built automated daily batch pipelines in Azure Data Factory to ingest eClinicalWorks (eCW) EHR reports from cloud storage, processing records for 12,000+ patients and replacing manual spreadsheet workflows with a structured, auditable data system.
- Shipped to production a full-stack healthcare scheduling and QA platform supporting 29 active users, owning backend services, database schema design, and system architecture end-to-end.

Georgia State University

Atlanta, GA

Graduate Teaching Assistant

August 2025 – May 2026

- Provided technical code reviews for 100+ Data Structures students and evaluated semester-long software engineering projects for 17 teams.

InsuraPro

Roswell, GA

Software Developer

May 2023 – January 2025

- Engineered core backend business logic and built Spring Boot API endpoints to handle complex data exchange for a high-scale Guidewire PolicyCenter (PC) pricing product.
- Architected and designed relational SQL database schemas to support new product features, data persistence, and backend integrations.
- Ensured robust version control, sprint-tracking, and documentation using Bitbucket, Confluence, and Jira.

PROJECTS & OUTSIDE EXPERIENCE

SNN vs Classical Machine Learning Benchmarking

Atlanta, GA

Student Machine Learning Engineer

February 2026 – April 2026

- Designed and optimized a fully connected SNN in PyTorch utilizing latency encoding to convert static pixel intensity into temporal spike trains.
- Ran hyperparameter experiments to benchmark accuracy and evaluate performance trade-offs against classical ML models.

Plateful

Atlanta, GA

Student Software Engineer

September 2025 – December 2025

- Contributed to end-to-end development of a cross-platform mobile app, following Agile methodology across the full SDLC.
- Built using React Native, Azure Cosmos DB, Firebase Authentication, and Anthropic Claude AI.
- Collaborated with a cross-functional team on requirements gathering, design, implementation, and deployment.
