

# Amelia Shengaout

Atlanta, GA, USA | (678) 478-5677 | ameliaashengaout@gmail.com | [LinkedIn](#) | [GitHub](#) | U.S. Citizen

## PROFESSIONAL SUMMARY

Software Engineer and MSCS student with Full-Stack experience (React, Spring Boot) focused on backend development with specialized coursework in Machine Learning.

## SKILLS

**Programming Languages:** Java, Python, JavaScript, SQL (MySQL), NoSQL (MongoDB, CosmosDB), HTML/CSS

**Frameworks/Libraries:** Spring Framework (Spring Boot, Spring Data JPA), React, Node.js, PyTorch, Scikit-Learn, NumPy, Pandas

**Cloud & Tools:** Azure, Firebase, Jupyter Lab/Notebook, Bitbucket, Git, Maven, Excel, Jira, Confluence, REST API

**Languages:** English, Russian **Transferable Skills:** Written & Verbal Communication Skills, Collaboration, Leadership

## EDUCATION

**Georgia Institute of Technology, Atlanta, GA**

*Master of Science in Computer Science (Admitted Fall 2026)*

**August 2026 – May 2028 (expected)**

**Georgia State University, Atlanta, GA**

*Master of Science in Computer Science (Transferring to Georgia Institute of Technology)*

**August 2025 – Present**

*GPA: 4.2*

Courses: Operating Systems, Computer Architecture, Advanced Machine Learning, Algorithms, Data Structures.

**Kennesaw State University, Kennesaw, GA**

*Bachelor of Science in Biochemistry*

**August 2019 - May 2023**

## PROFESSIONAL EXPERIENCE

**1st Care Management**

*Software Developer*

**Atlanta, GA**

*April 2026 - Present*

- Provisioned and configured full Azure cloud infrastructure (App Service, SQL Database, Data Factory, Logic Apps, Entra ID) across dev/QA/prod environments.
- Designing and building full-stack healthcare scheduling and QA platform using Django, Spring Boot, and React.

**Georgia State University**

*Graduate Teaching Assistant*

**Atlanta, GA**

*August 2025 – May 2026*

- Provided technical code reviews for 100+ Data Structures students and evaluated semester-long software engineering projects for 17 teams.

**InsuraPro**

*Software Developer*

**Roswell, GA**

*May 2023 - January 2025*

- Developed the client-side of a high-scale Guidewire PolicyCenter (PC) product for Pricing Departments.
- Designed and implemented the React frontend, integrated it with a Spring Boot backend, and architected SQL database schemas.
- Ensured robust version control and collaboration using Bitbucket, Confluence, and Jira.

**Kennesaw State University**

*Undergraduate Research Assistant*

**Kennesaw, GA**

*January 2022 - May 2023*

- Performed phosphorus NMR research on prebiotic chemical evolution while mentoring 5 students in standardized lab protocols and scientific workflows.

## PROJECTS & OUTSIDE EXPERIENCE

**Neuromorphic AI Research: SNN vs Classical Machine Learning Benchmarking**

*Student Machine Learning Engineer*

**Atlanta, GA**

*February 2026 - Present*

- Investigating whether artificial latency encoding can bridge the accuracy gap between Spiking Neural Networks (SNNs) and classical ML models (SVM) on static image classification tasks.
- Designing and optimizing a fully connected LIF-neuron SNN in PyTorch (snntorch) with an 85.47% accuracy, converting static pixel intensity into temporal spike trains via latency encoding across 10+ controlled hyperparameter experiments.
- Exploring findings for a research paper on energy-accuracy trade-offs in neuromorphic vs classical approaches.

**Plateful**

*Student Software Engineer*

**Atlanta, GA**

*September 2025 - December 2025*

- Contributed to end-to-end development of a cross-platform mobile app, following Agile methodology across the full SDLC.
- Built using React Native, Azure Cosmos DB, Firebase Authentication, and Anthropic Claude AI.
- Collaborated with a cross-functional team on requirements gathering, design, implementation, and deployment.
